Specialty Clinic - 7201 Outer Loop

(502) 574.6699

Provides information, STD services, HIV antibody counseling and testing. Confidential testing is offered, anonymous testing is preformed upon request. Walk-ins are accepted. Call for hours.

HEPATITIS C

Did you know?

- Most people with Hepatitis C don't know they are infected. The only way to know is to get tested.
- Kentucky leads the nation with the highest incidence of Hepatitis C. Our rate is 7x the national rate
- Hepatitis C is a leading cause of liver cancer and liver disease
- Getting tested can help people learn if they are infected and get them into lifesaving care and treatment

Who should get tested?

- Baby boomers! Anyone born between 1945 and 1965. More than 75% of adults infected with Hepatitis C are baby boomers born from 1945 through 1965
- Current or former intravenous drug users, even if the person used only one time
- Anyone who received a blood transfusion before July 1992
- Anyone who has had unprotected sex with multiple partners or a partner with Hepatitis C
- Anyone who received a tattoo from an unlicensed tattoo parlor
- Anyone who received blood clotting factor treatment from a bleeding disorder before 1987
- Chronic dialysis patients

Where to get tested?
